## We Suggest to Our Customers That They Protect Their Trees

Planters and Nurserymen are particularly anxious to secure a perfect stand of their trees and to avoid as far as possible any injury to them by sunburn, rabbits, squirrels, etc.

For such protection we advise the use of—

### YUCCA TREE PROTECTORS

as we have found them to be very efficient and satisfactory to our many customers who are now using them.

The Yucca Protector is made from the Yucca Palm, being cut very thin (in the same manner as veneer wood) so as to admit plenty of ventilation and still afford the necessary protection for the young trees.

We are able to supply the Yucca Protectors, in the several sizes, at the following prices:

		Wgt.
